Jan Sobotka

jsobotka1188@gmail.com | johnny1188.github.io | Johnny1188

Education

Swiss Federal Institute of Technology in Lausanne (EPFL) Sep. 2024 – Aug. 2026
M.S. in Computer Science *Lausanne, CH*

- Weighted grade average: **5.73** (scale of 1.0 to 6.0, 6.0 is the highest)

Czech Technical University, Faculty of Information Technology July 2021 – June 2024
B.S. in Informatics, Specialization in Artificial Intelligence *Prague, CZ*

- Weighted grade average: **1.05** (scale of 1.0 to 4.0, 1.0 is the highest)

Research Experience

Research Assistant at the Autonomous Systems Group July 2025 – ongoing
University of Texas at Austin, Oden Institute for Computational Engineering and Sciences *Austin, US*

- Used mechanistic interpretability and game theory to show where LLM agents' observations, beliefs, and actions come apart in strategic play, and how they reveal or conceal private information [2,3].
- Supervised by Prof. Ufuk Topcu.

Research Assistant at the MLBio Lab Aug. 2024 – July 2025
Swiss Federal Institute of Technology in Lausanne (EPFL) *Lausanne, CH*

- Fine-tuned 70B+ multimodal foundation models (DeepSpeed, LoRA) for captioning and semantic segmentation.
- Improved *weak-to-strong generalization*, a testbed for aligning models more capable than their supervisors, by dynamically reweighting weak teachers' signals, with 30%+ gains under distribution shift [5].
- Supervised by Prof. Maria Brbić.

Research Intern at the Computational Systems Neuroscience Group Sep. 2023 – Aug. 2024
Faculty of Mathematics and Physics, Charles University *Prague, CZ*

- Developed a state-of-the-art method for decoding images from neural population activity [6].
- Supervised by Prof. Ján Antolík.

Computational Neuroscience Research Intern July 2023 – Sep. 2023
Biozentrum, University of Basel *Basel, CH*

- Designed computational models of spiking neural networks and applied dynamical systems theory to demonstrate how bistable neuronal dendrites enable a 1,000-fold increase in memory capacity.
- Supervised by Dr. Everton J. Agnes.

Publications

* denotes equal contribution

[1] Latent Taxonomies: How Property Induction Develops in Language Model Pre-training. [PDF]
Jan Sobotka, Ekaterina Goliakova, Marcin Detyniecki, Antoine Bosselut, Xavier Renard.
Under review.

[2] Why Do LLMs Struggle in Strategic Play? Broken Links Between Observations, Beliefs, and Actions. [PDF]
Jan Sobotka, Mustafa O. Karabag, Ufuk Topcu.
Under review (PNAS).

[3] Do LLMs Strategically Reveal, Conceal, and Infer Information? A Theoretical and Empirical Analysis in The Chameleon Game. [PDF]
Mustafa O. Karabag, **Jan Sobotka**, Ufuk Topcu.
*Conference on Autonomous Agents and Multiagent Systems (**AAMAS 2026, Extended Abstract**).*

[4] Reverse-Engineering Memory in DreamerV3: From Sparse Representations to Functional Circuits. [PDF]
Jan Sobotka, Auke Ijspeert, Guillaume Bellegarda.
*Neural Information Processing Systems (**NeurIPS 2025, Spotlight at Mech Interp Workshop**).*

[5] Weak-to-Strong Generalization under Distribution Shifts. [PDF]
Jan Sobotka*, Myeongho Jeon*, Suhwan Choi*, Maria Brbić. (joint first authors reordered here)
*Neural Information Processing Systems (**NeurIPS 2025**).*

[6] MEIcoder: Decoding Visual Stimuli from Neural Activity by Leveraging Most Exciting Inputs. [PDF 🔗]
Jan Sobotka, Luca Baroni, Ján Antolík.
*Neural Information Processing Systems (**NeurIPS 2025**).*

[7] Enhancing Fractional Gradient Descent with Learned Optimizers. [PDF 🔗]
Jan Sobotka, Petr Šimánek, Pavel Kordík.
ArXiv preprint (2025).

[8] Investigation into the Training Dynamics of Learned Optimizers. [PDF 🔗]
Jan Sobotka, Petr Šimánek, Daniel Vašata.
*International Conference on Agents and Artificial Intelligence (**ICAART 2024**).*

[9] Investigation into the Training Dynamics of Learned Optimizers (Student Abstract). [PDF 🔗]
Jan Sobotka, Petr Šimánek.
*AAAI Conference on Artificial Intelligence (**AAAI 2024**).*

Industry Experience

Research Data Scientist Feb. 2026 – Aug. 2026
AXA GO, Advanced AI Modeling Team *Paris, FR*

- Built continued pre-training pipelines to study data impacts on the development of inductive reasoning and generalization in language models (70M–7B, FSDP) [1].
- Identified inverse scaling of inductive reasoning, where at a fixed data budget larger models shift from generalization toward memorization. Relevant for data curation and domain adaptation.

Junior AI/ML Engineer June 2021 – June 2023
Generali Czech Republic *Prague, CZ*

- Deployed machine learning solutions to production for text and product recommendation (35% improvement over previous method), client churn prediction, email classification, and customer segmentation.
- Built computing infrastructure for the company's 90+ member internal data science community.

Selected Projects

Deep Reinforcement Learning for Optimal Experimental Design in Biology Jan. 2023 – June 2023

- Open-science project focused on efficient estimation of biological system parameters [OpenBioML 🔗].

Generative Models of Regulatory DNA Sequences Based on Diffusion Models July 2022 – Dec. 2022

- Open-science project investigating the application of diffusion models to genomics data [OpenBioML 🔗].

Extracurricular Activities

Organizer of the Traion Community of Student Entrepreneurs June 2020 – Feb. 2021

- Organized offline meetings, educational seminars, and workshops for student entrepreneurs.

Volunteer for an Entrepreneurship Education Program for Students Dec. 2019 – Aug. 2020

- Organized events and wrote a technology/entrepreneurship blog for the Soutěž and Podnikej organization.

Pitcher at the Czech Republic National Baseball Team U-15 Jan. 2017 – July 2017

- Secured third place at the U-15 European Baseball Championship 2017.

Honors and Awards

The Bakala Foundation Scholarship: Awarded to top 7% of applicants (academics & extracurriculars) | 2024
Merit-Based Scholarship, Czech Technical University: Awarded for a high academic average | 2021, 2022, 2023
National Benchmark Exam in Mathematics SCIO 🔗: Scored higher than 97% of the 875 test takers | 2021
Algorithms & Programming Competition FIKS: Ranked 4th out of 107 participants | 2020
TOP25 Czech High School Students of the Year 2020: Selected based on extracurricular activities | 2020

Skills

Programming languages: Python, C, C++, Julia, JavaScript, Go
ML & LLMs: PyTorch, JAX, Hugging Face (Transformers, PEFT), FSDP, DeepSpeed, TransformerLens
Infrastructure: Slurm, Docker, Git, Azure, AWS, Weights & Biases
Languages: Czech (native), English (C1, TOEFL iBT 105), German (A2)
